EDUCATION

Sinhgad Institute of Technology and Science

Narhe

Bachelors in Computer Engineering (8.53 sgpa)

MIT-WPU

Kothrud

Diploma in Computer Engineering (86.57 %)

Aug. 2021 – May 2024

EXPERIENCE

Full Stack Developer Intern (MERN)

June 2025 – August 2025

Shivrai Technologies

Hybrid

- Engineered 5+ full-stack modules using React.js, Node.js, and MongoDB to digitize farm data workflows, reducing manual processes and improving operational efficiency.
- Designed and implemented secure RESTful APIs with JWT authentication and role-based access control (RBAC), enhancing platform security and reliability.
- Optimized Docker-based CI/CD pipelines through GitHub Actions, enabling faster deployments and stable hybrid cloud environment synchronization.
- Collaborated within an Agile team of 4+ developers, actively participating in sprint planning, code reviews, and timely feature delivery.

Frontend Developer Intern

July 2022 - August 2022

Softronixx

Remote

- Design and developed responsive UI's to ensure seamless performance across devices and platforms.
- Performed debugging and maintenance to resolve UI issues and enhance functionality.
- Collaborated with teams to optimize code, ensuring scalability and performance.

PROJECTS

AI Chat Application (DeepSeek-style LLM App) | *Next.js, React.js, MongoDB, Clerk, OpenRouter*

Link

- Built a full-stack AI chat application enabling real-time conversations using LLM APIs.
- Integrated OpenRouter with fallback handling for API failures and quota limits.
- Implemented user authentication (Clerk) and persistent chat storage using MongoDB.
- Designed scalable backend APIs for efficient context handling and performance.

Pingup : Full-Stack Social Media Platform | *React.js, Node.js, Clerk, Ingest, ImageKit*

Link

- Developed a feature-rich social media application enabling secure user authentication, profile management, and seamless onboarding powered by **Clerk**.
- Implemented efficient **background job scheduling** using Ingest to handle notifications, message queues, and asynchronous tasks.
- Integrated **ImageKit** for optimized media storage and delivery, ensuring high-quality images with fast load times.
- Engineered core social functionalities including real-time chat, post and feed system, follow/unfollow, friend requests, and story uploads—delivering an engaging and interactive user experience.

Crypto Price Tracking App | *Html, CSS, React, API's*

Jan 2025

- Developed a crypto price tracking application using React.js, leveraging modern JavaScript frameworks for efficient and dynamic UI/UX.
- Integrated the CoinGecko API to fetch real-time cryptocurrency prices, ensuring up-to-date information for users.
- Implemented responsive design to deliver seamless user experiences across various devices and screen sizes.
- Optimized API calls and state management to enhance app performance and reduce data loading times.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C/C++, Java, HTML/CSS

Frameworks: Next.js, React.js, Express.js, Node.js, Tailwind CSS,

Developer Tools: Git, GitHub, Postman, VS Code, PyCharm, IntelliJ, Eclipse

DevOps & Cloud: Docker, GitHub Actions, CI/CD Pipelines

Databases & ORM's: MySQL, MongoDB, Redis, Prisma ORM,

ACHIEVEMENTS & PARTICIPATION

Awarded 2nd Prize in the state-level project competition **Technovision 2023** at AISSMS College for showcasing innovative solutions and technical expertise.

Achieved 3rd Prize in the national-level **Startup & Poster Competition, Technothon 2023**, at Anantrao Pawar College for presenting a groundbreaking project idea with potential real-world applications.

Actively Participated in multiple Hackathons
